Shake Vigorously Before Each Use

Accurately measure, add and mix well into the desired volume of fresh water.

For best results: continuously aerate reservoir solutions.

Recommended pH range: 5.4-6.5. Do not let the pH exceed 6.8.

Recovery systems: Recommend to drain and add fresh solution every 14-28 days.

Hand-Feeding: Use with each watering (feeding). For slower growth and/or low light levels use every 2-4 weeks or as needed.

This chart is only intended as general guidelines and use rates may be adjusted as per individual needs.
