

## CLONING GEL

LIFE™ Cloning Gel contains a blend of rooting hormones and all natural ingredients. Formulated to produce roots in any substrate, this gel will work with rooting cubes or aeroponic machines.

- Contains IBA and B1 vitamin for root development
- Water-based, non-toxic formula
- Natural antimicrobial ingredients to keep plants healthy

### GUARANTEED ANALYSIS

#### ACTIVE INGREDIENTS

Indole-3-butyric acid (IBA).....	0.3%
Thiamine HCl (vitamin B1).....	0.005%
Total Other Ingredients.....	99.695%

### DIRECTIONS FOR USE

Dip cutting into LIFE Cloning Gel and insert into rooting medium.

*LIFE Cloning Gel is protected from degradation by a naturally-occurring biocide, Thyme Oil, which has GRAS (Generally Regarded As Safe) status and, under FIFRA 25b is exempt from EPA registration. This differentiates LIFE Cloning Gel from competitive products which use synthetic chemical biocides such as 1,2-benzisothiazol-3(2H)-one which have known health and environmental concerns and require EPA regulation.*

## CLONING MIST

LIFE™ Cloning Mist is a foliar product designed for use in propagation stage. Provides essential ingredients and anti-stress bioactive molecules to assist root development and stress recovery for cuttings taken from stock plants.

### DIRECTIONS FOR USE

- STEP 1:** Spray the leaves of stock plants one week prior to taking cuttings.
- STEP 2:** Take cuttings from stock plant and place into growing medium. (aeroponic/rockwool/peat/coco)
- STEP 3:** Spray cuttings after planted in growing medium.
- STEP 4:** Spray cuttings every 2-3 days until transplant.
