FILL LINE

DIRECTIONS FOR USE: MAKING CONCENTRATE

- STEP 1: Fill container with warm water to the top of the green Fill Line on this label.
STEP 2: Securely tighten the lid and shake vigorously for 30 seconds.
STEP 3: Wait 1 minute and then shake again for 30 more seconds.
STEP 4: Remove the lid, add 2 more cups of warm water, tighten the lid and shake for 30 more seconds.

You now have a liquid concentrate that is ready to mix with water for creating superior plant nutrition for everything you grow!

APPLICATION INSTRUCTIONS

****DO NOT MIX CONCENTRATES BEFORE ADDING TO WATER****

Always add one formula concentrate at a time to the full amount of water.

- STEP 1: Add 30mL of either the Growth or the Flowering Formula concentrate for every 1 Gallon of nutrient solution being made and mix thoroughly.
STEP 2: Add 15mL of the Base Formula concentrate to every 1 Gallon of nutrient solution and mix thoroughly.
STEP 3: Stir well and adjust the pH of the finished feed per guidance below.

Hydroponic or Soilless	5.6 - 5.8 pH
Soil	6.0 - 6.2 pH
