Cyco Commercial Series Grow & Bloom is great for all hydroponic applications such as drip systems, DWC, rock wool and coco it is also suitable for all soil applications.

Our Commercial Series range of products contains all the added macros, micros and amino's that are needed to grow and flower a perfect crop with no extra additives needed, or additives can be added if the grower desires different specifications, for optimum results.

Cyco Commercial Grow and Bloom are developed and manufactured in Australia.

BASIC FEEDING SCHEDULE

Follow this feeding schedule if you are a beginner or you have no need for additives.

VEG / GROW

1 gram per Liter

BLOOM / FLOWER

1.5 - 2 grams per Liter

OPTIONAL (At 700 scale)

For vegetation stage 800 to 1000 ppm.
For flowering stage 1400 to 1500 ppm is full strength.

CYCO SWELL Week 5 - 8 of Flower / Bloom add 2mL per Liter

CYCO SUPA STIKY Week 5 - 8 of Flower / Bloom add 2mL per Liter

RECOMMENDED pH Coco 5.5 - 5.8 Hydro 5.5 - 5.8 Soil 5.5 - 5.8

This schedule is simply a starting guide, every step is different and amounts used can be adjusted to suit your plants conditions and environment to reach the ideal feeding regime.

Visit the Cyco forums for further information on the Cyco range of products.

COMMERCIAL GROW & BLOOM

Cyco Commercial Series Grow & Bloom are one-part micronized powder fertilizers developed with the aim of providing growers a more convenient, economical solution while at the same time still giving the exceptional results in both yield and quality that Cyco products are well known for around the world.

Containing everything needed to sustain your plants through their entire life cycle while still allowing the grower the ability to incorporate additives that may be beneficial to their particular plant choice.

Commercial Series is compatible with all water types with no changes needed to the mixture or the amount used, when you dissolve Commercial Series Grow & Bloom into your water it is visibly clear and leaves no residue.

Directions

Commercial Grow & Bloom products contain a mixing scoop (1g = 1ml) which makes it easier to accurately measure the products.

For best results mix separately (warm to hot water recommended) prior to adding to main reservoir.

We recommended use of an air or water pump in the reservoir. For the larger commercial applications we recommend an agitator or mixing pump be used.

Guaranteed Analysis:

Total Nitrogen (N)	10%
10% Nitrate Nitrogen	
Available Phosphate (P ₂ O ₅)	5%
Soluble Potash (K ₂ O)	13%
Calcium (Ca)	7%
Magnesium (Mg)	1.5%
1.5% Water Soluble Magnesium	
Sulfur (S)	1.8%
1.8% Combined Sulfur	
Iron (Fe)	0.1%
0.1% Chelated Iron	
Manganese (Mn)	0.05%
0.05% Chelated Manganese	
Molybdenum (Mo)	0.001%

Derived from Calcium Nitrate, Potassium Nitrate, Monopotassium Phosphate, Magnesium Sulfate, Iron EDTA, Manganese EDTA and Sodium Molybdate

NOTICE: The application of fertilizer material containing molybdenum (Mo) may result in forage crops containing levels of molybdenum (Mo) which are toxic to ruminant animals.

COMMERCIAL BLOOM

Guaranteed Analysis:

Total Nitrogen (N)	8%
8% Nitrate Nitrogen	
Available Phosphate (P ₂ O ₅)	6%
Soluble Potash (K ₂ O)	11%
Calcium (Ca)	6%
Magnesium (Mg)	2%
2.0% Water Soluble Magnesium	
Sulfur (S)	2.7%
2.7% Combined Sulfur	
Iron (Fe)	0.1%
0.1% Chelated Iron	

Derived from Calcium Nitrate, Potassium Nitrate Monopotassium Phosphate, Magnesium Sulfate Iron EDTA.

- Specially Formulated For Outstanding Results In All Grow Media.
- Enhanced With Amino Acids For Increased Nutrient Uptake And Performance.
- No Extra Additives Required.
- No Extra Cal-Mag Required.
- pH Stable & Buffered.
- Soft and Hard Water Compatible.
- No mess, No residues, Simple Usage.
- Available in 750g, 1.5kg, 5kg & 20kg
