

# AP SERIES

## PORTABLE HEPA AIR FILTRATION SYSTEM

XPOWER is proud to introduce The Brushless DC Motor Line Of Upright AP Large Volume HEPA Air Filtration Systems with PM2.5 Sensors. This new series of air scrubbers provide all the power needed for improving indoor air quality on large jobs, while being able to precisely control the speed to its lowest level for all day ultra-quiet operation in settings like classrooms, business, and in occupied facilities where noise level is important. All of this is accomplished through our revolutionary DC Brushless

Motor, where power meets precision. While drawing only a MAXIMUM 1.5-8.0 Amps, and rated at 700-1800 CFM, the XPOWER Upright AP Line of HEPA Air Filtration Systems will provide the capability and ultimate versatility in high-volume air exchanges while featuring precise variable speed control. A new feature built-in the AP Line is our digital PM2.5 indoor air quality sensor. Color coded in green/orange/red with a digital readout to monitor your indoor air quality.

### Features:

- The most revolutionary large volume ultra-quiet and powerful DC Brushless Motor line of air scrubbers on the market
- Built-in digital PM2.5 air quality meter helps you monitor the air quality with an easy-to-read digital layout and color coded air quality meter
- Efficiently remediate large spaces such as: hospitals, schools, arenas, gyms, conference halls, hotels, and any other largely occupied areas
- Quiet enough for your everyday operation in settings like offices, schools, and businesses
- Cord storage compartment and also durable aluminum kick plate for easy tilt function
- Easy change filters, no special tools required
- Duct-able exhaust outlet for creating negative air applications
- One-piece durable roto-molded polyethylene housing with wheels for easy mobility
- Easy to service, clean, and decontaminate in between uses to eliminate the possibility of cross contamination
