

BT NOW[®]

PRODUCT BULLETIN

FIFRA 2(ee) RECOMMENDATION

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or accepted by the U.S. Environmental Protection Agency.

ISSUE DATE:

December 10, 2021

EXPIRATION DATE:

December 31, 2024

FOR USE AND DISTRIBUTION ONLY IN THE STATES OF:

CALIFORNIA

EPA REGISTRATION NO. 89046-12-70299

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Crop: Crop Group 13-07 Small Fruits and Berries, such as: Blackberries, Currants, Grapes, Raspberries, Strawberries, Cranberries (except Highbush Blueberries and Kiwifruit)

Target Pest	Rate (Pint/Acre)
Corn Earworm	2.00-3.50
Armyworms	1.00-3.50

Foliar applications:

Apply at first signs of infestation when larvae are small, newly hatched, and actively feeding. Repeat applications, according to economic threshold, as necessary to maintain control.

BT NOW must be ingested by susceptible larvae to be effective. Thorough coverage of target foliage where larvae are feeding is essential. To improve wetting and distribution on difficult to wet foliage (e.g. crucifers), the addition of a wetting agent is recommended.

Make applications early in the morning, in the evening, or during overcast conditions for best results. Make sure to apply the product when there is little or no wind. Do not make early morning application if foliage is wet with dew to the point of runoff. Do not make applications when significant rainfall is imminent. BT NOW is more effective when rain is not forecasted within 24-48 hours following application. Dry weather will allow larvae to ingest a lethal quantity of spray deposits.

BT NOW may be applied up to and on the day of harvest.
