

## Directions

# Green Cleaner

Shake Green Cleaner REALLY WELL before measuring and shake again every few minutes during application. [Important] For Outdoor: spray early morning or late evening. We recommend applying Green Cleaner at the rate necessary for the application. Test on 1-2 plants before applying to your entire garden. If you must use in late flower (last 2-3 weeks), remember that it is better to spray a light mix (1/2 oz per gallon). Use lower dilution ratios of plants exhibit signs of damage or stress.

## Propagating Tips & Tricks with Green Cleaner Important Pre-Cloning Preparation

### Preventive Maintenance Application

1/2 oz Green Cleaner / per 1 gallon of water

To ensure your clones have a clean start, thoroughly spray the "mother plant" with Green Cleaner at least two hours prior to propagation.

Always spray any new starts before you introduce and transplant them into your garden.
