

Multi-Chamber Grow Tent Assembly Instructions

Note: Having a friend assist you with the assembly can be very helpful

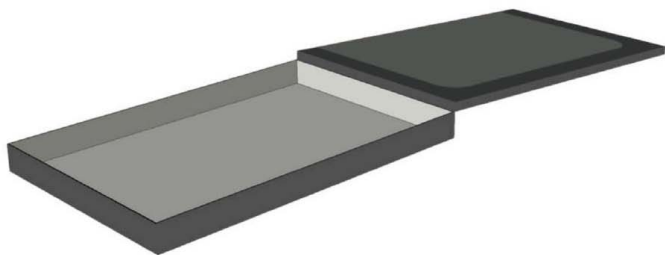

Parts List:

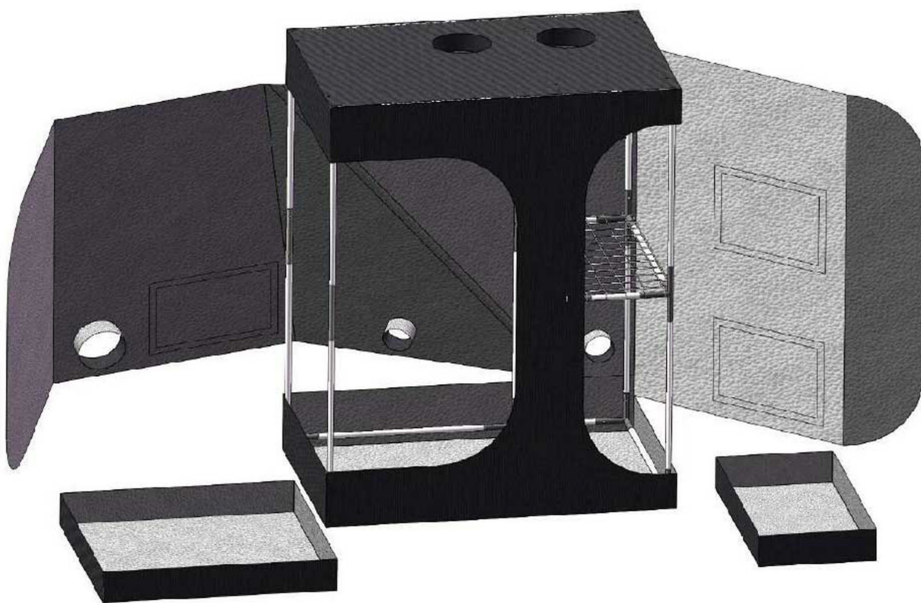

C

Connect the grow tent framework ensuring the poles are seated properly in the corner connectors. It may be necessary to gently twist the poles back and forth to make a secure connection.

- 2** Lay out the grow tent outer canvas, making sure that all zippers are completely undone.

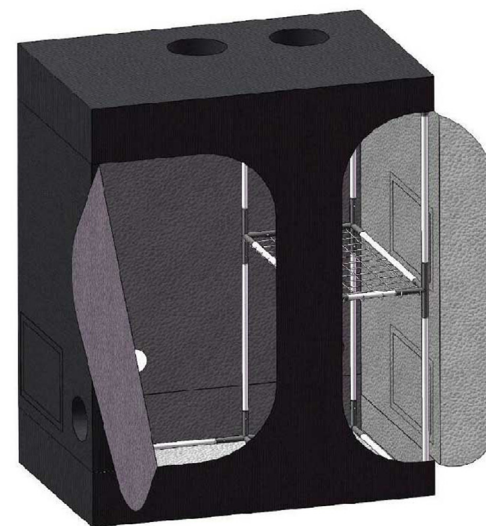

- 3** Pull the grow tent outer canvas over the constructed framework. Ensure all framework corners are seated well in canvas corners.

- 4** Install the floor spill trays in the correctly sized sides. Tie the corner straps of the spill trays to the nearest framework pole.

- 5** Install the roof cross-bars as shown on the first page of these instructions. Install the mesh screen onto the shelf of the smaller side of the grow tent.

- 6** Install the separator wall between the two tent chambers and secure velcro completely. Install the final spill tray onto the shelf and tie the corners.
