

DIG Living Wall Vertical Garden Kits

Part 1: Installation of Mounting Brackets & Containers

DIG's new Living Wall Modular Vertical Garden System features a new concept that allows quick positioning, mounting, and expansion of planted pots vertically. The system utilizes framed mounting brackets which may be attached to any interior or exterior structure to transform a space into a green growing environment

What is a DIG Living Wall?

- Vertical container garden attached to a wall, fence, or vertical surface
- Utilizes specialized modular containers & mounting brackets
- Complete kit with drip-irrigation system included
- Designed for the do-it-yourselfer
- Easy to expand and arrange
- Beautify a variety of areas

GLW08 & GLW08I (BSP threads)- Kit Contents

Step 1: Select a well lit location

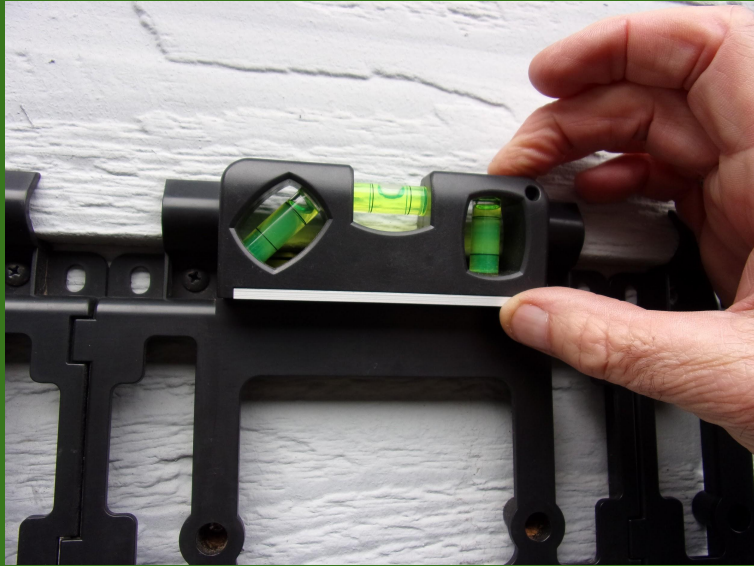

Recommended for Installation in:

- Courtyards
- Entryways
- Patios
- Balconies
- Exterior walls
- Fences

Step 2: Layout & Install the Mounting Brackets

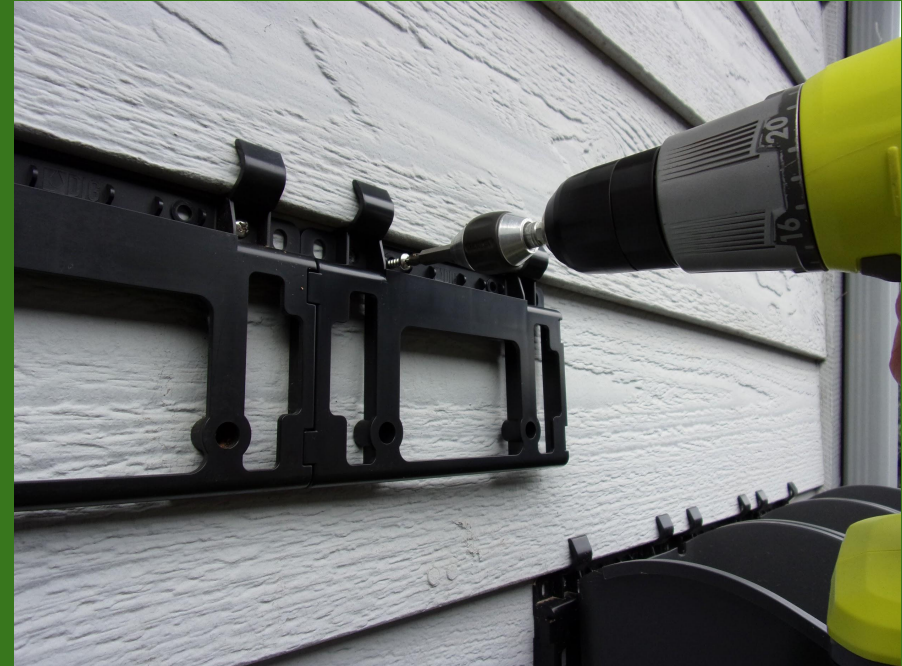

Place the bracket in the desired location, check for level & mark the screw holes

Step 2 : Install the Mounting Brackets (continued)

Drill screw holes ($\frac{1}{8}$ " bit)

Install screws & secure the brackets

Step 3: Transplant the Plants

Place drainage screen in bottom of pot

Add potting soil

Step 3: Transplant the Plants (continued)

- Take care & try to minimize damage to the root ball during transplantation
- Fill in around root ball with more potting soil
- Hand water the plant and let the container drain completely

Step 4: Place & Arrange Containers onto Brackets

Attach pots to mounting brackets by sliding hook on back of pot into slot on bracket
