

F5 PORTABLE VENTILATION FAN

PLEASE READ INSTRUCTIONS CAREFULLY BEFORE OPERATION!

F5 portable ventilation fan by DL Wholesale combine strength and quality into one through the use of sturdy, durable steel, top-tier quality bearings! F5 portable ventilation fan feature advantages such as: powerful wind-flow, low heat output, energy efficiency, easy transportation, also features a sturdy, protective steel guard for safety. F5 Fans are meant for industrial use only.

1. CHIEF TECHNICAL DATA

Spec (mm)	Rated voltage (V~)	Rated frequency (Hz)	Input power (W)	Air delivery (CFM)	Spec (Phase)	Rotating speed (r/min)
200	120	60	150	882	Single	2800
250	120	60	320	1517	Single	2800
300	120	60	520	2117	Single	2800
400	120	60	1200	3177	Single	2800
450	120	60	1700	4411	Single	2800

2. EXTERNAL DIMENSIONS

SIZE (mm)	A	B	C	D	E
200	290	248	200	220	295
250	290	248	250	270	350
300	358	248	300	320	405
400	465	205	410	435	470
450	460	205	450	480	520

3. OPERATING INSTRUCTIONS

- Before use, please check if the voltage and frequency marked on the nameplate conform to that of local power supply.
- The Fan must be storage in the clean and dry environment and make sure without shaking. While operating, the Fan should not be adjusted or moved.
- Please turn off the Fan immediately in case of any abnormal noise nor ther abnormal situation while it is running, and contact professional personnel for maintenance.
- Ambient temperature limits: -10 °C min.+40 °C max.
- Please do not use the Fan in the place where the explosive or flammable substances, dust or gas are stored.
- Maintenance work should not be attempted before first switching off and isolating the Fan. It is essential to ensure that rotating parts have come completely to rest before maintenance work commences.
