

Top Hat

Vertical DE (Reflector)

SKU: GL-THR

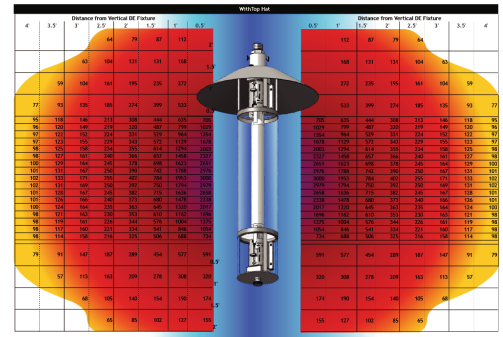

Lost light is a waste that should be captured and used. By adding the Top Hat reflector to your Vertical DE fixture, you'll increase the available light the emitter outputs, taking that light and redirecting it into the canopy.

Designed for upper placement to feed light to the top canopy and primaries, the Top Hat reflector acts as a traditional parabolic reflector by directing even light into the canopy.

Features

- ◀ Keyhole feature secures Top Hat
- ◀ Designed to reflect vertical light and redirect to canopy
- ◀ Can be mounted upside down for additional reflectivity
- ◀ Sweet-spot lighting solution
- ◀ Simple installation
- ◀ Increase garden efficiency
- ◀ No tools necessary for assembly
