

SolarSystem Controller

Nature Meets Technology.

The SolarSystem controller puts you in control of your garden. A single controller can automate a single light in a grow tent or a 1000 light commercial operation and controls all the lighting products in the SolarSystem series. Maximize your yield while minimizing power consumption.

Features

- Automatically Program any Growth Stage or Spectrum Mix.
- Separate Natural White View Mode.
- A Single Controller Runs an Unlimited Number of Lights.
- Automated Sunrise/Sunset for Better Daily Growth.
- Digital Timer Eliminates the Need for External Timers or Contactors.
- Day, Week or Seasonal Programming.
- Smooth Transitions from Veg to Bloom.
- Customized Strain Specific Grow Schedules.
- Controls Separate UVB and Far Red Modules.
- Optional Photo Sensor Available for Sunlight Balancing in Greenhouses.
- Green Backlit Touch Screen.
- Automatic Dual Voltage Power Supply – 120/240 V.
- Uses Standard RJ11 Data Cables.
