Capacity: 200 Gallons

Box size and weight:
46 x 5 x 7" / 13.7lb

When full of water:
35.5" Diameter x 46" High

Capacity: 265 gallon

Box size and weight:
35 x 8 x 6.5" / 16.5lb

When full of water:
47" Diameter x 35.5" High

Assembly Instructions

- 1 Unpack the contents of the box and ensure all parts are correct.
- 2 Unfold and open your blue FlexiTank.
- 3 Attach the tap to the bottom of the FlexiTank by pushing it through the hole, keeping the tap at a 90 degree angle anticlockwise (until the tank is full - see 7), ensuring there is a rubber on the outside and the inside of the tank and tighten the nut as tight as possible.
- 4 Insert all support poles into the side sleeves of the FlexiTank.
- 5 The Flexitank is now ready to be turned upright and moved into place. Ensure that the Flexitank is placed on a flat and smooth surface to prevent damage to the plastic.
- 6 Place the support band around the FlexiTank BEFORE it is filled with water. Slide band down the tank so it is positioned just above the tap. As the tank is filling ensure that the band is level around the tank.
- 7 Fill the Flexitank. Once full with water, twist the tap 90 degrees clockwise to the correct position.
- 8 The FlexiTank comes with a 1 year guarantee, covering manufacturing defects. Any misuse of the product is not covered by the guarantee.
