

## ReadyGro:

### Ingredients:

3/4" double-sieved coir fiber, perlite, humic acid derived from leonardite, fertilizer.

NOTE: 8" and 6" bags comes in Aeration Formula only

## Cocogro:

### Ingredients:

coir fiber

## Pure Earth:

### Ingredients:

Coir fiber, composted rice hulls, thermophilic green compost, pumice, perlite, humic acid (derived from leonardite ore), seaweed (derived from Ascophyllum nodosum), fish meal, alfalfa meal, composted poultry litter.

# READYGRO™

Soiless Organic-Based Planting Media

## AERATION FORMULA:

### 4 - 6 waterings daily

This blend is specifically designed for automated hydrogardens and self-watering planters with small to midsize plants. The Aeration blend is light and porous with 15% more perlite. The additional Perlite creates more airspace which allows more Oxygen to reach the root zone.

## Aeration Formula:

- For automated hydrogardens, self-watering pots and planters, and container gardens
- Perfect for planting fruits, flowers, vegetables, houseplants, orchids, cacti and succulents

## MOISTURE FORMULA:

### 1 - 2 waterings daily

Our Moisture formula is designed for outdoor use, hand-watering or automated pots and planters with large plants. It contains more coir fiber for enhanced moisture retention and to better anchor larger plants. ReadyGro Moisture Formula performs well in both indoor and outdoor environments.

## Moisture Formula:

- For container gardens, self-watering pots and planters, and hydrogardens
- Perfect for planting fruits, flowers, vegetables, houseplants, orchids, cacti and succulents

# COCOgro™

Premium Soiless Organic Grow Media

## COCOgro:

### premium coir fiber

Cocogro contains 3/4 long, double-sieved fibers to reduce dust, provide air space and optimal air to water ratio for strong root development. Cocogro has excellent drainage properties allowing it to be used longer than coir with shorter fibers. Our coir fiber is aged a minimum of 18 months to finish its decomposition stage. In addition, Cocogro is exposed to rain water from at least 3 monsoon seasons, which naturally washes harmful salts from the final product. Many other coir fibers are aged only 4 to 5 months and may have excessive potassium and salts that require chemical treatment.

## Cocogro:

- Ideal for self watering pots and planters, container gardens and hydrogardens
- Perfect for planting fruits, flowers, vegetables, herbs, greens, houseplants, orchids, cacti and succulents

# PURE EARTH™

Premium Organic-Based Potting Soil  
Organic-based, all natural ingredients

## INDOOR AERATION:

### increased aeration

A fully composted, organic-based soil blend. Our Aeration Formula contains more pumice and perlite to create more airspace and allow more oxygen to reach the root zone. These properties make it more suitable for indoor applications and some outdoor soil applications.

## Indoor Aeration Formula:

- Indoor gardens, hydroponics, outdoor container gardens
- Houseplants, plants that require less moisture
- Optimum cation exchange capacity (CEC)
- Optimum air to water ratio for indoor gardens
- Higher porosity for better aeration

## OUTDOOR MOISTURE:

### better moisture retention

A fully composted, organic-based soil blend. Our Moisture Formula contains more coir fiber to retain moisture in hotter climates and outdoor uses for less frequent waterings.

## Outdoor Moisture Formula:

- Outdoor container gardens and hydroponics
- Fruits, Vegetables, Plants that require more moisture
- Optimum cation exchange capacity (CEC)
- Optimum air to water ratio for outdoor gardens
- Retains moisture for less frequent waterings
