PH ADJUSTERS								
Hades Down	5.8-6.2	5.8-6.2	5.8-6.2		6.2-6.8	6.2-6.8	6.2-6.8	6.4
Olympus Up	5.8-6.2	5.8-6.2	5.8-6.2		6.2-6.8	6.2-6.8	6.2-6.8	6.4

The most important thing with any indoor garden is the soil that you start with. We at Oregon's Only Organics encourage all gardeners to test their soils' pH and parts per million (PPM). When using Nectar For the Gods, your garden will perform at its peak in a planting medium with a 6.4-7.0 pH and a nutrient charge between 400-600 PPM. If your soil tests come out with a low pH and/or a high PPM, a pre-planting flush with Herculean Harvest and/or Olympus Up Liquid Lime will correct these issues before planting.
