V-N 5 ml per gallon, FCB 2-4 ml per gallon, FPT 2-4 ml per gallon												

SRF Granular Supplement

V-N Granular * 5-2-2
V-PK Granular * 0-5-5
V-K Granular * 0-2-5

3-5g. Root Zone												Water Only
1-3g. Root Zone				2-3g Top Dress								Water Only
1-3g. Root Zone						2-3g Top Dress						Water Only

Notes for the Grower: Applying Granular in Coco applications is highly recommended. Add at Transplant/or bury 1/4" around the drip line/stem of plant.

For top dress applications, apply below a layer of compost or 1/4" below soil surface. SRF Granular is slow release activated by consistent moisture/watering.

Double recommended amount for every 15 gallon increase of Soil.
