## EXPERT COCO & SOIL RECIPE

Visit [botanicare.com](http://botanicare.com) for additional pre-developed recipes and recommendations.

Amounts in ml/gallon (4 l) 1 teaspoon=5 ml 1 tablespoon=15 ml 1 ounce=30 ml

Photoperiod	18	18	18	18	12	12	12	12	12	12	12	12	12
Stage of Growth	Seedlings / Clones	Vegetative			Bloom Transition				Flowering / Fruiting			Ripening	Flush
	Week 1	Week 1	Week 2	Week 3	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6	Week 7	Week 8	Week 9
<b>PBPro Grow</b>	7 ml	8 ml	10 ml	10 ml	0	0	0	0	0	0	0	0	0
<b>PBPro Bloom Soil</b>	0	0	0	0	10 ml	10 ml	12 ml	12 ml	12 ml	12 ml	12 ml	9 ml	0
<b>Liquid Karma</b>	2 ml	8 ml	8 ml	8 ml	4 ml	4 ml	4 ml	4 ml	4 ml	4 ml	4 ml	4 ml	0
<b>Vitamino</b>	2 ml	5 ml	5 ml	5 ml	10 ml	10 ml	5 ml	5 ml	0	0	0	0	0
<b>Cal-Mag Plus</b>	0	3 ml	3 ml	5 ml	5 ml	5 ml	5 ml	4 ml	4 ml	3 ml	3 ml	0	0
<b>Sweet Products (all)</b>	0	0	0	0	8 ml	8 ml	8 ml	8 ml	8 ml	8 ml	8 ml	8 ml	0
<b>Hydroplex</b>	0	0	0	0	0	0	2 ml	3 ml	3 ml	3 ml	2 ml	0	0

### Hydroguard

Use 2 ml per gallon with every watering.

- Contains scientifically isolated beneficial bacteria, Bacillus Amyloliquefaciens.
- Naturally maintains a healthy root zone.
- Breaks down nutrients into plant available form.

### Silica Blast

Use 4 ml per gallon with every watering.

- Strengthens branches & stalks to support bigger yields.
- Protects root zone.
- Increases resistance to environmental stress.

### ZHO

Apply 1/2 tsp per plant site every 2 weeks.

- Contains beneficial fungi for your root zone.
- Endomycorrhizae increase nutrient uptake and promote rapid new root growth.
- Contains a high level of the amino acid, L-Glycine.

### Clearex

Flush using 10 ml per gallon of Clearex 1 week before harvest time to ensure an optimal flavor profile.

- Safely flushes out excess nutrient buildup.
- Preharvest treatments with Clearex enhance flavor & aromas in fruits, vegetables, and culinary herbs.
- Repairs over-fertilized grow media.
