HEALTHIER FOLIAGE - PROMOTES ROOT GROWTH - STOPS TRANSPLANT SHOCK

DIRECTIONS FOR USE

Transplanting: Drench newly planted soil area with HORMEX solution containing 1 teaspoon per gallon of water (10 drops per 1 gallon), once per week until established.

Bare Root Planting: Before placing bare root plants into soil, soak plants for 15 minutes in solution of 2 tablespoons HORMEX per gallon of water. Then follow the "transplanting" directions.

Lawns and Groundcover: Use 1 oz. per 100 sq. ft. applied through hose end sprayer.

Indoor Plants: Apply 1 teaspoon HORMEX per gallon of water, every time you water. This helps plants develop a healthy root system and lush foliage.

Cut Flowers: 1/2 teaspoon HORMEX per quart vase makes cut flowers last longer.

Cuttings: Dip the base of cuttings in full strength HORMEX for 1-5 minutes before planting.

Hydroponics: 1- 2 tsp. per 5 gallons when changing or adding water.

Aeroponics: 1- 2 tsp. per gallon of water.

Store in cool, dry place. Keep in original container.

Do not reuse container.

CAUTION: KEEP OUT OF REACH OF CHILDREN.

STATEMENT OF PRACTICAL TREATMENT:

Eyes: Flush eyes with water for 15 minutes.

Skin: Wash with soap and water. Ingestion:

Do not induce vomiting, promptly drink large

quantities of water. Get medical attention. Do

not use this product on plants intended for

food or feed purposes.
