PART 2

SOIL Feeding Schedule

Use your preferred FoxFarm potting soil when transplanting seedlings into larger containers. We recommend a two gallon size or larger. **FOR BEST RESULTS:** Feed once per week. Avoid oversaturation of soil with fertilizer solution. Maintain a pH of 5.6 to 6.8 to prevent nutrient lockout and reduce stress on plants.

Never mix pure concentrates together; always add water first. Should plants show signs of stress or color irregularities, flush your soil. When using coco-based media, flush every two weeks during the flowering cycle as coco has a tendency to retain unwanted salt residue more than peat-based soils.
