BONIDE®

Rat Magic™ Repels Rodents

Rat Magic™

Bonide Rat Magic™ effectively repels rodents from around your homes, garages, barns, sheds, ornamental gardens, stables, trash cans, woodpiles, patios, decks, cellars, and other areas where rodents may be a problem. May be used in areas where children and pets play. Bonide Rat Magic™ is biodegradable and will not harm lawns, gardens, flowerbeds or other desirable plants when used as directed.

How It Works

The unique blend of ingredients in this product triggers "escape/avoidance" behavior in rodents. This balanced blend of natural essential oils humanely provides maximum repellency, without harm to animals.

Indoor Use

This product is packaged in convenient scent packs that can be easily placed where needed. This is particularly helpful for those difficult to reach areas like drop ceilings and behind large appliances, and in preventing infestation of stored pet food and bird seed. This product also masks scent trails, which helps prevent reinfestation.

To Apply: Simply distribute the scent packs around any area rodents hide, feed or congregate. For attics, staple scent packs to rafters. Pay particular attention to areas around walls and other surfaces that may serve as runways, to any areas of potential entry, and to potential nesting areas.

Begin treatment with one scent pack per average sized room. Increase the number of scent packs, as needed, until desired results are achieved. Heavier infestations may require more scent packs per room. While this product contains natural essential oils, and it's odor is very pleasant, too many scent packs in a small area can be overpowering. Should this occur, simply reduce the number of scent packs used.

Outdoor Use

After the rodents have left the indoor areas keep them from returning by creating a Perimeter/Barrier with the scent packs. Block all points of reentry and place scent packs at all entry points and around structure.

To repel squirrels from bird feeders, scatter scent packs around the base of the feeder, and at/on the feeder itself by stapling or hanging the scent pack with a twist-tie, string or staples to the feeder.

NOTE: Effective rodent control begins with good cultural practices such as exclusion, and sanitation. To keep rodents out of structures and premises, be sure all points of entry are sealed, including attics and basements. Also be sure all sources of food are secured, including animal feed, bird food, pet food and table refuse. Severe infestations should be cleaned out prior to using this product. Revenge Rat Traps may be helpful in this regard. Do not apply to furniture, painted surfaces or fine finishes without testing on a small inconspicuous area first.

This product is exempt from registration with the Federal EPA under section 25(b) of FIFRA, and as such, is not registered with the Environmental Protection Agency. Bonide represents that the ingredients qualify for exemption from registration under FIFRA.

First Aid

Product can cause moderate eye irritation. For certain individuals, skin irritation may occur. In case of eye contact, flush with plenty of water. In case of skin irritation, wash area thoroughly with soap and water. Seek medical attention if irritation persists.

Storage and Disposal

Store and transport in an upright position. Store only in original container, in a dry place inaccessible to children and pets. Do not reuse empty container. Discard empty container in trash.

Other Precautions: Do not apply directly to water.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with label directions.
