

TipTopBio[™] Control

HOW IT WORKS

CERTAIN INSECTS ARE PERISHABLE AND TIME SENSITIVE AND ARE BEST IF MAILED DIRECTLY TO THE CUSTOMER. THIS PACKAGE CONTAINS ONE PRE-PRINTED POST CARD. PAY AT THE REGISTER, MAIL IN THE POST CARD, INSECTS WILL THEN BE SHIPPED DIRECTLY TO YOU FROM THE FARM.

RELEASE INSTRUCTIONS

1. Outdoors: Release when temperatures are below 90°F. Do not release in heavy rain. Remove the lid on the container, place in infested plant, insects will fly out on their own. For faster release, remove lid and tap bottom of container.
2. Indoors: This insect prefers to fly to a sunny window or the brightest place in the structure. They will return to the plants when the light diminishes. To avoid this behavior, shade the window or release at dusk.

Storage: Storage more than one day past arrival date is not recommended. If you must, store in a cool, dark place, approximately 60°F. Do not refrigerate, or place insects directly next to cold packs.

Strategic Considerations: Best to release *Aphytis melinus* in 1-3 week intervals upon detection of Scale until low Scale numbers are observed.
