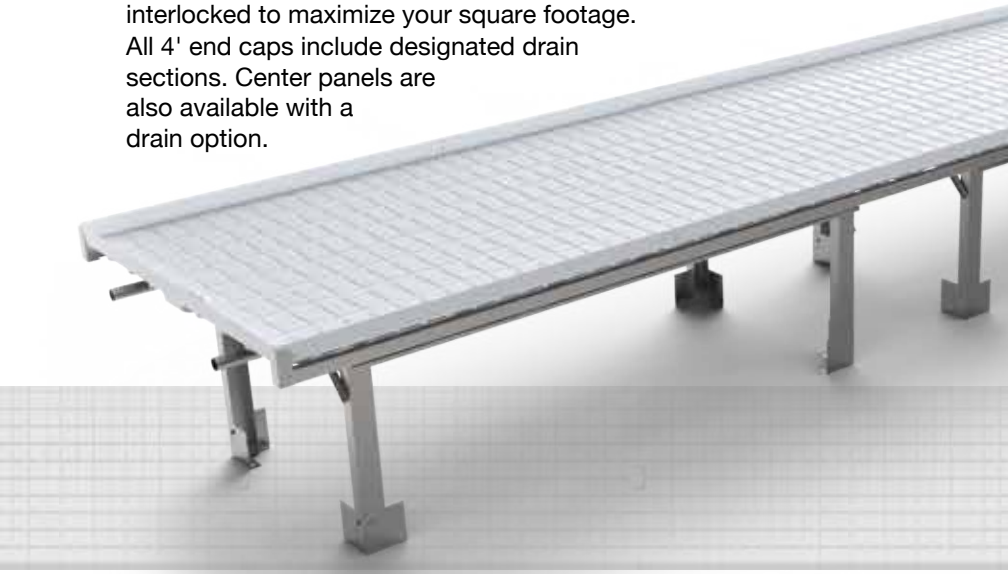
INFINITY SERIES ∞

Maximize your square footage!

Designed for Commercial Installations

Active Aqua introduces the Infinity Tray series— an array of premium ABS panels that work with standard 4' wide benches. These trays are available in 4' and 8' center lengths, creating a continuous grow space when interlocked to maximize your square footage. All 4' end caps include designated drain sections. Center panels are also available with a drain option.



FEATURES

- **No arch lip** allows you to maximize your inner and outer grow/work space
- **10%–15% thicker** than other bench trays
- All panels are **low profile** at 2.5" in height

Infinity Trays overlap, saving valuable space

Other trays create wasted space between units

Recommended for use with our Rolling Bench System (AGT10001)

All corresponding panels nest perfectly, allowing you to create custom lengths to your needs

3D technology ensures that the molds are 100% accurate, resulting in consistent product quality

Our products stand up to outside testing, and are used for research because they are known for reliability and accuracy.

Fabrication Standards for Plastics

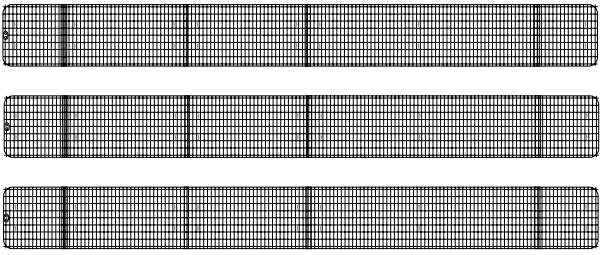
At Hydrofarm, we closely monitor the quality and details of the fabrication process. The software we employ uses 3D technology to ensure that the molds are 100% accurate, resulting in consistent product quality. The use of computer-controlled milling machines enables us to produce customized, high-detail designs, and we also utilize laser-guided CNC trimming to achieve refined edges. Through vacuum thermoforming, our ABS plastic hydroponics products are given their characteristic shape and uniform thickness. Virgin capped sheet-forming provides color integrity and long life. Finally, customized palletization ensures ease of shipping and handling.

COMPARE: *Infinity Trays vs. Standard 4 x 8 Flood Trays in a 40 x 20 Grow Room*

INFINITY SERIES

460 sq ft

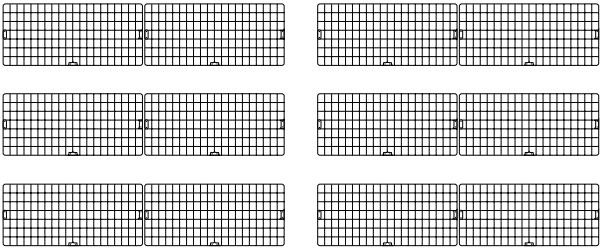
of tray growing area



VS.

384 sq ft

of tray growing area with standard 4x8 flood trays



Why choose premium resin ABS for your plastics?

ABS (ACRYLONITRILE BUTADIENE STYRENE)

- Chemical and heat resistant
- Stable and non-leaching
- 100% recyclable
- Stable through a broad range of temperatures with increased strength, rigidity, and chemical resistance

vs.

OTHER PLASTICS

- Poor barrier to oxygen and water vapor and has a relatively low melting point
- Very slow to biodegrade and is therefore a focus of controversy among environmentalists
- Flammable

BPA FREE

100% RECYCLABLE

MADE IN CANADA
