Ful-Humix™

Ful-Humix™ is a soluble, concentrated humic acid and powerful soil/nutrient activator. In the root zone it reduces the uptake of sodium, aluminum and other metals that negatively affect plants. Ful-Humix® prevents the tie up of nutrients and trace elements through chelation and complexing. All crops should be using Ful-Humix L. It can be used in all production systems and throughout the entire lifecycle of the crop. Also, make sure to use it during the spring season as this is when it will be most effective and you will see the most long-term benefits.

Benefits

- Improves efficiency of applied fertilizers.
- Early applications show positive effect on cell elongation, cell division and root development.
- Increases water holding capacity and CEC of the soil
- Improves overall plant health and decreases risk of abiotic stress.
- Optimizes plant performance and improves soil conditions for improved crop establishment.

Application Rates

Soil/Soilless/Hydroponics	1/2 tsp -1 tsp/gal
Compost Tea/Foliar Sprays	1/8 tsp-2 tsp/gal
Soil Fertility	3-12 lbs/acre
Soil Mixing	1-2 lbs/cubic yard
Lawn & Garden	2-4 oz/1,000 sq ft

Ful-Humix™ can be applied to all crops including; trees, vines, ornamentals, small fruits, vegetables, row crops, feed crops, forage, and pasture. It can be applied by in-furrow, and at planting. Consult with your agronomist for the correct number of applications.

Physical Properties

Form	powder
Color	dark brown/black
Odor	mild odor
Solubility	95-99% water soluble
pH	9-11

Gauranteed Analysis

Component	Analysis	Test Method
Humic Acid	50%
