

SolarSystem UVB

Features

- Supplemental UVB light - 285-315 nm
- Improves resin development and potency
- Used during the last few weeks of flowering
- Works with the SolarSystem Controller and Control Module (sold separately)
- Piggy back design offers up to 10 unit installation from a single outlet

UVB light enhances plant growth, improves essential oils and aromas as well as chemical profiles. For use as a supplemental light along with other primary grow lights. Use caution not to expose eyes or skin to UVB light.
