

TipTopBio[™] Control

HOW IT WORKS

CERTAIN INSECTS ARE PERISHABLE AND TIME SENSITIVE AND ARE BEST IF MAILED DIRECTLY TO THE CUSTOMER. THIS PACKAGE CONTAINS ONE PRE-PRINTED POST CARD. PAY AT THE REGISTER, MAIL IN THE POST CARD, INSECTS WILL THEN BE SHIPPED DIRECTLY TO YOU FROM THE FARM.

RELEASE INSTRUCTIONS

1. Once Cryptolaemus have arrived, the package should be opened immediately and released as soon as possible.
2. Keep the Cryptolaemus in the container that they arrived in while transporting them to release site. Once you have arrived, allow them to reach the ambient air temperature.
3. When they become active, they are ready to be released.
4. Cryptolaemus should be shaken directly into infested plants. In an orchard, it is not necessary to apply them to every plant because they will move about on their own.
5. Concentrate the release where Mealybug populations are the highest.

Storage: Cryptolaemus can be stored for a few days if necessary between 55 to 65°F.

TipTopBio[™] Control

THE ULTIMATE!

MEALYBUG EXTERMINATOR

Cryptolaemus montrouzieri

PREDATOR to various types of Mealybugs.

Package Contains: 25 Cryptolaemus montrouzieri beetles
The Cryptolaemus is the most effective way to control Mealybugs, even more effective than chemicals. Relative to the Ladybug, Cryptolaemus feed on all stages of Mealybug development. Cryptolaemus colonize in your yard all season until the Mealybugs are destroyed. Pay at the register, mail in the post card and the insects will be shipped directly to you from the farm. Complete release instructions are included with insects. Purchase price includes shipping charges. **Guaranteed Live Delivery!**
