## HOW IT WORKS

CERTAIN INSECTS ARE PERISHABLE AND TIME SENSITIVE AND ARE BEST IF MAILED DIRECTLY TO THE CUSTOMER. THIS PACKAGE CONTAINS ONE PRE-PRINTED POST CARD. PAY AT THE REGISTER, MAIL IN THE POST CARD, INSECTS WILL THEN BE SHIPPED DIRECTLY TO YOU FROM THE FARM.

## RELEASE INSTRUCTIONS

1. When you receive the beetles, place them in a cool spot until you are able to release them.
2. DO NOT REFRIGERATE THEM.
3. Release *Delphastus* in the cool part of the day when the sun is not very bright, ideally after sunset or dawn if it is not possible to put them out at sunset.
4. To release the *Delphastus*, take the cups to the area for release. If it is cool, the *Delphastus* will not be very active and you may remove the lid of the cup and begin sprinkling them out over the infested area. Be careful to not dump them all out on the first shake.
5. Concentrate the release in areas known to have higher populations of the Whiteflies, but be sure to spread some in all areas where Whiteflies are present.
6. *Delphastus* adults and larvae feed on Whitefly eggs and larvae. For this reason, it is common to see them on the undersides of leaves even when no adult Whiteflies are present on that leaf.

**Storage:** Do not store for more than 4 hours. Store at a moderately humid 56-66°F. Hold at a slightly humid 40-45°F.
