FLY

Exterminators

An Organic Way to Control Flies!

Exterminates: House Fly, Horse Fly & Filth Fly

(Muscidifurax raptorellus)

Fly Parasites attack Horse Fly, House Fly, and Filth Fly. These tiny flying insects are completely biteless, stingless and do not bother humans or animals. Fly Parasites go virtually unnoticed, only flying inches off the ground. This package contains Fly Parasites in a parasitized pupae stage and will be hatching or close to hatching upon receipt.

Release Rate: Approx. 1,000 predators per large animal. (See Reverse)

Release Frequency: Monthly during warm months. (Heavy infestations may require additional releases).

Package Contains: 2,000 Fly Parasites
