Gard'nClean Extended Release Basic Directions

Directions For Use:

1. Open the clamshell and remove insert and foil pouch.
2. Tear open outer pouch and remove the Gard'nClean Extended Release sachet. Do not rip, tear or puncture the sachet.
3. Place the Gard'nClean Extended Release sachet back inside the clamshell.
4. Product is humidity-activated. To facilitate product activation, relative humidity of the treatment area should be at least 25% RH for the duration of the treatment.
5. Position the Gard'nClean Extended Release sachet centrally in an enclosed treatment area. Ensure that product is placed at least 4-6 feet off the ground, or suspended from ceiling.
6. For sealed indoor spaces, replace the Gard'nClean Extended Release sachet every 30 days. For use in greenhouse & high humidity environments, please contact Company.

For full instructions, see our Directions for Use on the label, or consult the Gard'nClean Institutional SOP.
