

ILUMINAR

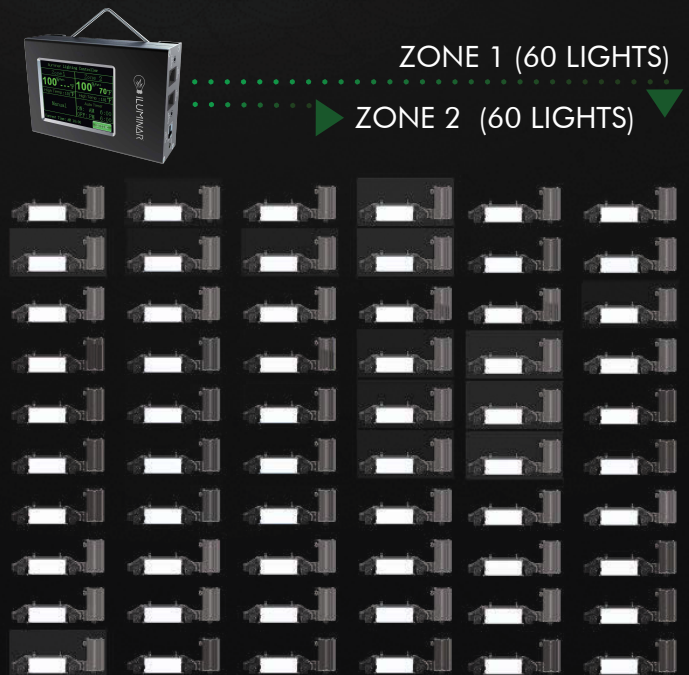

CONTROLLER 
Touch Screen

The new, **ILUMINAR** Touch Controller is taking control of your gardens lighting to a level of simplicity that will allow any gardener to perfect their lighting schedule with just a few “touches”.

The **ILUMINAR** Touch Controller will control two zones or two separate rooms of lights within a 24 hour cycle. The controller will be able to turn groups of lights on and off, simulate sunrise and sunset, as well as apply several other functions like overheat protection, all from touch screen control.

The **ILUMINAR** Touch Controller will now allow you to control up to 60 lights per zone or room, with two channels you can control up to a total of 120 lights. This will take even your beginner garden to the commercial level, all of these features packed into the ILUMINAR Touch Controller.
