#### MIXING INSTRUCTIONS

Always add to a reservoir of clean water at every feeding during all stages of growth. It is very important to add POWER SI before any other nutrient or booster to maximize the effectiveness. Mix 0.5ml per gallon of water. For more feeding instructions and ideas, visit [powertotheplants.com](http://powertotheplants.com)

#### PURPOSE

Silicon has been shown to improve plant tolerance to abiotic stresses such as cold, heat, drought, and salinity as well as improve plant structural strength.

#### WARNING

The application of fertilizer material containing molybdenum (Mo) may result in forage crops containing levels of molybdenum (Mo) which are toxic to ruminant animals.
