RELEASE INSTRUCTIONS

1. When you receive the eggs, open the bag and check if the eggs have hatched, being careful not to touch the eggs. If they haven't hatched, store in a moderately humid location until hatching begins. Check daily.
2. Allow up to 10 days for hatch. Cards may be put out prior to hatch.
3. When hatching has begun, take the package to the release site. Flip the cards over (egg side down) and cut along the perforated lines with scissors.
4. Simply hang the cards in the canopy of the plant, away from the midday sun and protected from rain/water as much as possible. Tap the Wasps remaining in the bag out gently. All cards are hole punched for easy hangibility. Can be placed in the crotch of the trees as well. Do this in the evening or early morning hours.

Storage: Do not store the hatched Wasps in the bag for more than 4 hours.

Store at a moderately humid 54-64°F. Do not cold store the unhatched Wasps for more than 10 days. Store unhatched Wasps at a moderately humid 40-45°F.

Strategic Considerations: Be careful that the ants don't eat the eggs before they hatch, especially in the spring.
