

Uncle John's Blend 0-0-2

Uncle Johns is the product of years of research into what exactly is required to build both flavor and aroma in aromatic plants. What we discovered, was in trace amounts manganese, and zinc play a key role in building both a strong aroma and taste. We complexed these two elements along with potassium and iron to create an elixir that will promote bulking and ripening, along with improving fragrance and flavor.

Secondary benefits of Uncle Johns

- : Promoting a better cure.
- : Maintain a freshly harvested appearance
- : Helps in retaining a strong fragrance after harvest

The secret to success is yours.
