

FM-48

PORTABLE OUTDOOR MIST COOLING SYSTEM

XPOWER's FM-48 misting fan is a portable cooling solution that creates a comfortable outdoor environment during hot spring and summer days. Setup is quick and easy—simply plug in and connect to standard garden hose to reduce temperature up to 30°. A high performance sealed motor generates up to 600 CFM. Four nozzles distribute a fine mist over a wide area that will cool down outdoor patios, pool areas, picnics, sporting events, and other outdoor activities. Set up misting fan in gardens and greenhouses to keep plants healthy in harsh weather. Use the multipurpose FM-48 without the misting feature as a year-round drying and ventilation utility fan.

Why XPOWER products:

- Energy Efficient with Only 1.2 Amps Draw
- Quiet Performance with 3-Speed Settings
- Corrosion-Proof Polypropylene Housing
- Low Maintenance and Easy Operation
- Wide 4 Nozzle Misting Pattern
- Adjustable 135 Degree Multi-Pivot Positions
- Unit is Fully Assembled with Rack Included
- Dual-Purpose Utility Fan for Both Ventilation & Cooling Via Mist
