Safe & Effective Solution

Gnat Stix TRAPS

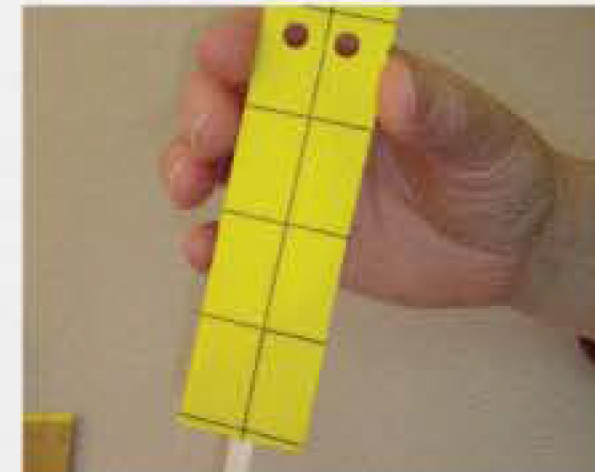

Pesticide free control of fungus gnats, aphids, plant lice
& other small insects infecting house plants.

Easy Instructions

Recommended for indoor use.

Safe for use in food-handling and food storage areas.

- Peel away the release paper from the traps.
- Attach trap to the wooden stakes provided. Use one sticky trap for each wooden stake.
- Use one Gnat Stix for each infested plant and one for all other plants in same room and nearby rooms. Avoid touching plant leaves with sticky paper.
- For best results, replace when full of insects or every 3 months.
- In case of skin contact, use vegetable oil to remove glue.

Gnats & Other Small Bugs Facts

The fungus gnats and other small flying insects are attracted to the bright yellow sticky traps, where they meet a sticky end. Effective for even the worst infestations of fungus gnats. These insects damage plants by feeding on their sap or leaves. Insects attracted to the trap are captured and killed in the powerful sticky glue. Use of the Gnat Stix Trap can reduce troubling infestations without the use of pesticides.
