

FOLIAR NUTRITION

3-3-2

Guaranteed Analysis

Total Nitrogen (N)	3.0%
3.0% Urea Nitrogen	
Available Phosphate (P ₂ O ₅)...	3.0%
Soluble Potash (K ₂ O).....	2.0%
Calcium (Ca).....	0.03%
0.03% Chelated Calcium (Ca)	
Magnesium (Mg).....	0.03%
0.03% Chelated Magnesium (Mg)	
Boron (B).....	0.06%
0.06% Water Soluble Boron (B)	
Copper (Cu).....	0.02%
0.02% Chelated Copper (Cu)	
Iron (Fe).....	0.01%
0.01% Chelated Iron (Fe)	
Manganese (Mn).....	0.06%
0.06% Chelated Manganese (Mn)	
Zinc (Zn).....	0.06%
0.06% Chelated Zinc (Zn)	
Derived from urea, monopotassium phosphate, calcium EDTA, monoammonium phosphate, boric acid, copper IDS, iron EDTA, iron IDS, magnesium EDTA, magnesium IDS, manganese EDTA, manganese IDS, zinc EDTA and zinc IDS.	

Application Instructions

Use Rate: 1 gallon per acre

Hype can be applied to all types of crops at 1 gallon per acre. Application should begin at V3-V5 and can continue throughout the growing season every 7-28 days as needed.

About Hype

Productive plants require balanced nutrition for ideal growth and development. Hype was created to provide corn and soybeans with a foliar supply of readily available nutrients, micronutrients and carbohydrates that are necessary for optimal yields. Hype should be applied in conjunction with herbicide applications to ensure that micronutrients are available when they are needed. Incite™ Plant Growth Regulator is an excellent partner product with Hype to maximize yield potential.

Benefits of Hype

- Correction of micronutrient deficiencies such as manganese - visual response within 48 hours after application on soybean.
- Reduction of “yellow flash” that can result from herbicide applications.
- Decreases burn potential of UAN when wheat is top-dressed at green-up.

Hype is Formulated with

KaPre® PhoNix — Contains organic compounds that help reduce the effects of environmental stress as well as optimize yield.

KaPre® Spectra — Stable, concentrated, organic acid solution with a broad range of highly active fulvic acid molecules that improve nutrient uptake and fertilizer absorption. Increases chlorophyll synthesis and improves overall plant growth.

Prudent® 44 — Formulated with patented urea phosphite, a unique form of phosphorus that is quickly absorbed by plants. It is extremely mobile within the plant and will complement systemic acquired resistance and contribute to overall plant health.

NPK, Krystal Klear® Calcium, Magnesium, Boron, Copper, Iron, Manganese and Zinc chelated with LidoQuest® IDS-40 —

Adequate, balanced nutrition is important for plant development and enhanced plant health. Micronutrients help build up the plants natural immune system to keep early season diseases at a minimum. Our micronutrients are chelated with LidoQuest IDS-40 and EDTA for superior performance. This patented dual-chelation technology results in better uptake with much lower rates than competitive products.

Sugar — An additional carbon source for energy that is immediately available to the plant. Also helps reduce burn on plant tissues from fertilizers.
