

MOBIUS M9 AUTOFEED CONVEYOR

Full automation is easily achieved by adding the M9 Autofeed Conveyor with its custom low-profile Autofeed Hopper, which swaps into place in seconds, tool-free. The Autofeed Conveyor can be fed directly from the M108S Trimmer, or from the Mobius Outfeed Conveyor if your operation includes hand touch-up on the Outfeed belt.

KEY FEATURES

- Full stainless steel construction
- Engineered specifically for processing
- Washdown-rated components
- Simple belt tensioning and removal
- Easily mates to the Mobius M108S Trimmer or Mobius Outfeed Conveyor
- Adjustable height to fit any trimming setup
- Variable speed and direction controls
- Hand-built in North America
