Net Pots

a product of
HUMBOLDT
county

Tired of throwing away your old broken net pots?

Try our Heavy Duty Net Pots and you'll never toss another broken one away. Our Net Pots feature a heavy gauge, dense plastic netting, which is significantly more resistant to cracking and breakdown than other light duty net pots. Available in three sizes, the Heavy Duty Net Pots are perfect to use in almost any kind of hydroponic system, including Ebb & Flow and NFT (Nutrient Film Technique).

Why use Net Pots?

Using Net Pots allows the roots to grow through the mesh for better breathing and growth. Orchids especially love Net Pots because they thrive on good air circulation in the root zone, exactly what Net Pots do best. See what they can do for your plants.

What kind of growing medium do I use?

You will have the best results when using expanded clay or loose Rockwool. Because of its small size, perlite is not recommended. We get excellent results by filling the pots with expanded clay as the base and then dropping in a seedling start in a Rockwool or Oasis cube.

How do I tell the difference between these and the cheaper pots?

Easy! Just the difference in weight will tip you off. The Heavy Duty Net Pots bend right back into shape without breaking. They will withstand many years of abuse that comes from repetitive growing cycles. Try the "Squeeze Test" for yourself and you'll find out why other net pots need to be replaced more often.

How are Heavy Duty Net Pots saving the environment?

Heavy Duty Net Pots are made in Humboldt County, using plastic from the Arcata, California recycling center. Also, since they will last forever, you do not create excess waste by throwing them away!

Specifications:

- Larger bottom holes for superior aeration
- Perfect for orchids and almost all other types of plants
- Excellent results with expanded clay pellets and loose Rockwool
- Holes on rim for easy hanging (medium and large only)
- 3" Net Pot has built in ridge, designed to hold a 3" neoprene insert perfectly!
- Easy to clean
- One-year warranty
