

Product Benefits

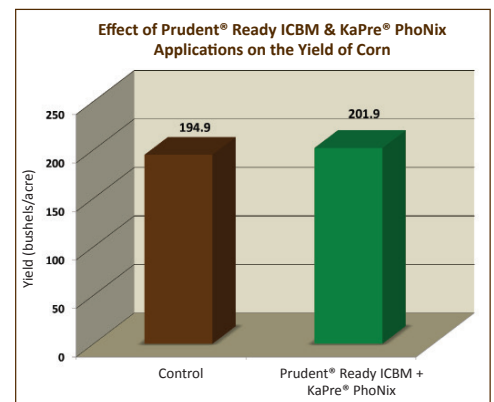

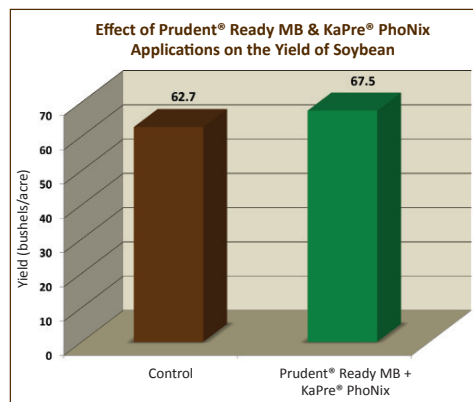

- Promotes plant growth by enhancing carbon fixation, particularly in plants that fix carbon via the C3 pathway
- Increases plant turgidity
- Promotes rapid growth and maturing
- Increases sugar content
- Reduces the watering requirement of the plant
- Enhances environmental tolerance of the plant
- Promotes growth in tissues of either juvenile or mature plants

PATENTED FERTILIZER SOLUTION

KaPre[®] PhoNix patented potassium fertilizer solution is intended for use as a foliar or soil applied supplement to a good fertility program.

KaPre PhoNix is formulated with LidoQuest[®] IDS-40 bio-degradable chelating agent and organic compounds for improved plant nutrient uptake.

KaPre PhoNix helps build tolerance against physical and mechanical injury and environmental stresses.

Ounces of KaPre PhoNix per Volume of Spray/Tank Solution	
Gallons of Solution per Acre	Ounces of KaPre PhoNix
2 - 4	0.75 - 1.5
5	1 - 2
10	2 - 4
25	6 - 8
50	16

Application Instructions

KaPre PhoNix can be applied as a foliar or soil application to all crops. Applications should be made at planting (if applicable) and then every 10 to 14 days throughout the growing season, as needed.

KaPre PhoNix should be diluted at a ratio of 400 parts spray solution to 1 part KaPre PhoNix. See table at right for application rates for different volumes of spray solution.

Fertilizer Additive Instructions: Mix with other fertilizer components so that the final fertilizer solution delivers KaPre PhoNix at the rates per volume of fertilizer solution listed in the table (right).

Products such as KaPre PhoNix perform best when tank mixed with fertilizers like Prudent Ready ICBM or MB.

Consult with your local Performance Nutrition Dealer for the program that works best for you.
