

TipTopBio[™] Control

HOW IT WORKS

CERTAIN INSECTS ARE PERISHABLE AND TIME SENSITIVE AND ARE BEST IF MAILED DIRECTLY TO THE CUSTOMER. THIS PACKAGE CONTAINS ONE PRE-PRINTED POST CARD. PAY AT THE REGISTER, MAIL IN THE POST CARD, INSECTS WILL THEN BE SHIPPED DIRECTLY TO YOU FROM THE FARM.

RELEASE INSTRUCTIONS

1. Orius are cannibalistic. Although supplied with food, predators should be released immediately upon receipt.
2. To release, sprinkle onto leaves.
3. Orius prefer flowering crops that produce pollen.
4. Does well under glasshouse conditions. Will not lay eggs at daylength of less than 11 hours.
5. Application rate: Approximately 2 per 10 sq.ft. when Thrips are present. Higher numbers should be used in hotspots.
6. Orius like to hide in flowers and may not be obvious on the foliage.

Storage: If not using immediately, keep in a cool (42-50°F) dark place out of direct sunlight.

Strategic Considerations: Do not release immediately before or after pesticide applications.
