

TipTopBio[™] Control

HOW IT WORKS

CERTAIN INSECTS ARE PERISHABLE AND TIME SENSITIVE AND ARE BEST IF MAILED DIRECTLY TO THE CUSTOMER. THIS PACKAGE CONTAINS ONE PRE-PRINTED POST CARD. PAY AT THE REGISTER, MAIL IN THE POST CARD, INSECTS WILL THEN BE SHIPPED DIRECTLY TO YOU FROM THE FARM.

RELEASE INSTRUCTIONS

1. Predators are highly perishable!
2. Release them the same day as received. Early morning, late afternoon, or when temperatures are not extremely hot. Cloudy days are perfect.
3. Allow predators to warm up to room temperature and release immediately.
4. Mites are fragile – do not shake. Apply by sprinkling onto dry foliage.
5. Begin releases at first sign of Thrips.
6. Do not release immediately before or after pesticide applications.

Storage: If not using immediately, keep in a cool (42-50°F) dark place out of direct sunlight

THE ULTIMATE!

THRIP EXTERMINATOR II

Amblyseius cucumeris

PREDATOR Thrips (Immature Stages),
Spider Mites, Broad Mites, Hemp Russet Mites.

**IMMATURE STAGES
OF THRIPS**

Package Contains: 50,000 *Amblyseius cucumeris*

Cucumeris is a species of predatory mite that feeds on immature stages of Thrips. It also feeds on pollen, Two Spotted Mites and other species of mites. Cucumeris adults are pear-shaped, tan colored mites, less than 0.5mm long. Upon purchasing, open the lid and shake the contents onto leaves or at the base of plant stems. General release is 5-20 mites per sq.ft., bi-weekly, 3-4 times.

Pay at the register, mail in the post card and insects will be shipped directly to you from the farm. Complete release instructions are included with insects. Purchase price includes shipping charges. **Guaranteed Live Delivery!**
